**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-8, drawn to a subject matter classified in class 382, subclass 131.
  - II. Claims 9-20, drawn to a subject matter, classified in class 600, subclass 538 and/or 587.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct if they do not overlap in scope and are not obvious variants, and if it is shown that at least one subcombination is separately usable. In the instant case, subcombination II has separate utility such as fitting an inner ellipse to an inner boundary of the given lung airway and an outer ellipse to an outer boundary of the airway structure using statistical techniques at a given point in the airway and measuring lung airway using the inner and outer ellipse. Such a utility is not required in Invention I. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
